

Certification & Accreditation

The Certification & Accreditation Department ensures that individuals and institutions meet recognised standards in AI governance, ethics, and responsible implementation. This department develops and oversees certification frameworks that validate knowledge, competence, and adherence to established AI principles.

For professionals, certification programmes provide a structured pathway to demonstrate expertise in AI governance, ethical decision-making, and compliance practices. For institutions, accreditation offers formal recognition of alignment with global standards, enhancing credibility, trust, and accountability in AI deployment.

The department works closely with academic bodies, training providers, and industry stakeholders to ensure that certification frameworks remain relevant, rigorous, and internationally recognised. It also provides guidance on programme alignment, assessment criteria, and institutional readiness.

Whether you are an organisation seeking accreditation or a professional aiming to validate your expertise, this department supports your journey towards recognised excellence in responsible AI.
