

Training & Capacity Building

The Training & Capacity Building Department is dedicated to equipping individuals and institutions with the knowledge and skills required to navigate the evolving landscape of artificial intelligence. This department designs and delivers structured programmes, workshops, and executive training sessions focused on AI governance, ethics, and responsible implementation.

Programmes are tailored to meet the needs of diverse audiences, including policymakers, corporate leaders, educators, and technical professionals. The department focuses on practical application, ensuring that participants not only understand key concepts but are also able to implement them effectively within their organisations.

In addition to standard training offerings, the department provides customised capacity-building solutions for institutions seeking to develop internal expertise or align with global standards. It also supports long-term learning pathways that contribute to professional development and organisational readiness.

This department is ideal for organisations looking to build internal capability, strengthen governance practices, and prepare for the responsible adoption of AI technologies.
